Dear Neighbour

Improvement works – Broad Street Underbridge

Network Rail is required to undertake essential upgrade and improvement works near your property. These improvements are a vital aspect of our strategy to provide a safe, reliable and efficient railway fit for the 21st century.

The work will involve the replacement of the Broad Street underbridge on the Ministry of Defence land 600m to the West of Bramley station. We need to replace this underbridge due to it being life expired. Enabling works will start on 21st November 2016 with the main bridge replacement taking place during a 57 hour possession starting from 22:00hrs 24th December 2016 until 07:30hrs 27th December 2016

We will be holding a drop in session where you will be able to discuss with the project team and the contractor what the new and improved underbridge will look like and find out further details of the works that will take place . We will also be able to give information regarding any road closures that may be required.

The drop in session will be held at Bramley village hall, The St, Bramley, Tadley, RG26 5BP on Thursday 20th October 2016 from 15:00 until 19:00.

The equipment we use means some disturbance is unavoidable, but we will make every effort to minimise any unnecessary noise. This will include limiting noisy operations to day time working only where possible. Furthermore, those working on site are briefed on working responsibly in the local community.

The works will be carried out on the Ministry of Defence land therefore residents should not be affected by the majority of the noise. Please see attached map of the area. There will however be a line closure over the Christmas period to replace this bridge.
